# Kofax Capture and Kofax Transformation Bundles

The Kofax Capture™ and Kofax Transformation™ bundles provide everything you need to intelligently capture, classify, separate, extract and export documents from virtually any channel. The competitively priced bundles make it easy to order Kofax Capture and Kofax Transformation—no matter how large or small the system. Together, these bundles offer the most comprehensive and value packed cognitive capture solution available on the market today. Get started with a first-year-free Kofax Capture system.*

OVERVIEW OF KOFAX CAPTURE

Kofax Capture creates digital images from documents received from multiple sources, such as mobile, email, MFPs, web, fax and scanners. Kofax Capture then extracts index data for retrieval purposes and delivers the images and associated data to a variety of repositories and applications. This can significantly reduce retrieval costs while improving regulatory and compliance efforts. Kofax Capture is flexible and scalable, enabling customers to define where and how images are captured and indexed, whether in a home office, remote branch or back office data center.

Kofax Capture is designed for almost any size enterprise that employs manual, error-prone or expensive processes for managing and processing large volumes of documents.

Market-leading and enterprise-proven, Kofax Capture provides a flexible, extensible, single-vendor platform that enables capture from any channel in any location, with capabilities for both centralized and distributed document processing. It also forms the foundation for many other Kofax products and solutions, including Kofax Transformation.

KOFAX

OVERVIEW OF KOFAX TRANSFORMATION

Kofax Transformation delivers cognitive document automation by adding document classification and separation, and data extraction and validation capabilities to Kofax Capture. By automating what were previously labor- intensive, inefficient, error-prone and time-consuming document processing tasks, Transformation can significantly reduce labor costs, boost productivity and efficiency, accelerate business processes, and better engage and empower customers. Transformation uses machine learning and artificial intelligence to recognize and understand any document. It automatically classifies and extracts invoices, orders, enrollment and claim forms, mailroom documents, mortgages, contracts, correspondence, and much more. Its cognitive machine learning technologies save time in initial configuration and ongoing maintenance, and its high levels of automation and exception handling efficiency deliver rapid payback.

Transformation is ideal for large and medium enterprises with manual, error-prone or expensive processes for classifying and separating many different document types, and manually entering data from those documents into the systems that need it. A license for 10,000 pages recurring "starter volume" of Kofax Transformation is now included with every Kofax Capture system version 10 or higher. The combination of Capture and Transformation has made Kofax the capture market leader, with more supported channels and exports than any other imaging product, and more supported document types than any other cognitive document automation product.

* First Year Free of Kofax Capture

Kofax Capture, the leading product for automating document processing for increased information visibility and compliance, lower operational costs and faster customer response times, can now be used in a full production environment for up to one year at no license charge. This exciting and unprecedented

"First-Year-Free KC" license provides the ability to capture, perfect, classify, separate and extract from email, fax, folder, XML, EDI, web service and scanner/ MFP sources and export to dozens of the most popular enterprise content management systems. The license includes all features of the Kofax Capture bundles for 10,000 scan/import pages, and expires one year from license creation. For volumes exceeding 10,000 pages per year, customers can take advantage of the competitively priced, value-packed Kofax Capture and Transformation bundles.

KOFAX CAPTURE BUNDLE CONTENTS

Feature	Description	Quantity
Kofax Capture Bundle Station License		
Enterprise capture station	Provides station license for capture activities on that station	1 - Enterprise Station license
Automated electronic document import	Provides document import capabilities from wide range of electronic sources, including: ◆ Email ◆ XML/EDI ◆ File/Folder ◆ Web services ◆ Fax/FOIP Also provides VRS image perfection on imported electronic documents	1 - Kofax Import Connector - Email integration 1 - Kofax Import Connector - Fax server integration 1 - Kofax Import Connector - FoIP integration 1 - Kofax Import Connector - File interface (folder) 1 - Kofax Import Connector - Web service interface 1 - Kofax Import Connector - VRS option
Enhanced barcode processing	Provides robust barcode reading capabilities for a wider range of barcodes and document layouts	1 - Enhanced barcode reader
MFP integration	Enables distribution of Kofax Capture business rules and scan jobs at the device panel for supported MFPs	1 - KFS server (per system) 1 - KFS MFP device connection
Thin-client scanning and manual document import	Enables thin-client scanning, manual document import and lightweight document processing	1 - KFS web client concurrent user
Image perfection	Adds the industry-leading Kofax VRS Elite™ image perfection capabilities to Kofax Capture	1 - VRS Elite Production for Kofax Capture
Kofax Capture Bundle Annual Volume License –100K		
Enterprise capture volume – 100K	Provides license for 100K images of capture volume per year	100K images per year
KT Unlimited Field Extraction Bundle – 10K	Includes license for 10k pages Kofax Transformation recurring "starter volume" providing advanced document classification, trainable document separation, unlimited field extraction, and table extraction for any document type.	10K images per year, per KC system
PDF image and text	Provides the ability to create and save a text layer with a scanned, OCR-processed image	1 - PDF image and text 100K images per year
PDF compression	Provides advanced file compression when exporting documents as PDF files	1 - PDF compression 100K images per year

KOFAX TRANSFORMATION BUNDLE CONTENTS

Feature	Description	Quantity
KT 5-Field Extraction - 10K pages per year		
5-field base license	Document classification and extraction of up to 5 fields per document	10K pages per year
Professional	Trainable document separation	10K pages per year
KT Unlimited Field Extraction - 10K pages per year		
Unlimited field base license	Document classification and extraction of unlimited number of fields per document	10K pages per year
Professional	Trainable document separation	10K pages per year
Table extraction	Extraction of data from tables	10K pages per year
