Power PDF Standard Advantages

Rely on the most accurate document and file conversion

With the industry's best conversion technology, Power PDF Standard precisely recognizes scanned text and faithfully reproduces complex layouts with columns, tables and graphics.

Make a portfolio package of your PDFs

Create a portfolio to combine individual PDF documents into a single, manageable package for easy sharing and distribution.

Productive document review and mark-up

Dynamic stamps and a wide range of commenting tools give you advanced functionality for efficient document reviews and collaboration.

Protect sensitive information with the redaction feature Redact or erase text by automatically inspecting documents to remove sensitive data for safe, secure document sharing.

Create interactive PDF forms from paper forms

With Power PDF Standard for Mac, create cross-platform fillable PDF forms making it easy for others to do business with you. Add radio buttons, tick boxes, text fields and signature fields and allow users to submit the forms in HTML, FDF, XFDF and PDF formats.

Create multiple searchable PDFs at once with Batch OCR

Convert as many documents into searchable PDFs as you want with the Batch OCR feature. Let the process run in the background as you continue working in Power PDF or other applications.

Benefits of Power PDF Standard

Don't retype your documents

If you must work with PDF documents in other applications, don't waste time re-creating them—convert them. Complex layouts with columns, tables and graphics are faithfully reproduced in Microsoft Word, Excel and PowerPoint documents.

Enhance document security

Add passwords with secure 128-bit or 256-bit AES encryption and permission controls to PDF files to control document viewing, printing and modification.

Manage and access your documents in the cloud

Save and access your stored documents in the cloud by connecting directly to Dropbox, Google Drive, or OneDrive. This gives you access to your documents anytime, anywhere or by applications of supported mobile devices.
